Policy on Continuance in Experiential Education

- Students must have an overall GPA of 2.0 to begin an experiential education experience (internship/coop)
- CMC Liaisons and staff have the responsibility of reviewing transcripts of experiential education students to confirm the 2.0 minimum GPA.
- Students must maintain an overall GPA of 2.0 to continue as a student in good standing within the experiential education program.
- If a student's GPA falls below a 2.0, the student will have one semester of probation to bring the GPA up to a 2.0. If the GPA is not a 2.0 after the one-semester probation period, the student will not meet the criteria for an experiential education experience.
- Employers should be notified once the student GPA falls below a 2.0. To adhere to FERPA guidelines, the employers should be informed that the student "no longer meets the criteria to be recommended by the Career Management Center to participate in the experiential education experience."
