What Can I Do?

How many ways can you come up with to use common items?

We’ll give you a common item that you see every day and your job is to list how many different ways it can be used. For example, what could you do with a piece of plain old copy paper?

Multiple students will compete at the same time but all work will be done individually. At the end of the allotted time, the student with the most uses for their item will be the winner.

Winners from the qualifying rounds will compete against each other in the semi-final and final round. The number of rounds will be determined by the number of student entries.

9 – 10:45 – qualifying rounds
11:00 – 11:30 – semi-final rounds
11:30 – 11:45 – final round
