This newsletter shares tips and resources related to ePortfolios, addressing concerns for students and instructors alike, in an effort to support the growing use of digital portfolios in the classroom.

**MULTIMEDIA TIP:**
**Finding Multimedia Material**

Looking for digital materials licensed for reuse and remixing?

**Video:** YouTube, Vimeo, TED, others

**Images:**
- Compfight search interface for Flickr (use the “Creative Commons” license option—[this video shows how](#)).
- Google Image Advanced Search
- others

**Audio:**
- Audio Repositories: Jamendo, ccMixter
- others

**Presentations:**
- Slideshare, AuthorSTREAM

**Alphabetic Texts:**
- Scribd, Google Books, others

**Other Multimedia**, and more

**MULTIMEDIA TIP:**
**Attributing**

Whether you are using something that is copyrighted or Creative Commons licensed, whether you uploaded or embedded it, **you must provide adequate attribution.** Attribution is important for two reasons:

1. to give credit where credit is due, and
2. providing a trail back to where you originally found the media.

Make sure you cite in such a way that:
- distinguishes your work from the work you are citing,
- provides a path back to where you found the original text, and
- does not disrupt the flow of your own text.

See these guides for citing digital sources in **APA, MLA, or CMS.**

**MULTIMEDIA TIP:**
**Using Multimedia Material**

Just because a resource is licensed for reuse, **doesn’t necessarily mean it is licensed for you to remix/edit it.** Determine the licensing as you decide whether you are adding the resource to your text without changing it or if you are editing it further.

**Google Drive Instruction**

When sharing or collaborating within Drive, you can control who has access to your material. You can also control to what degree others can interact with your material. Check your permissions carefully. ODU now has Lynda; check out these videos on sharing files and working with shared files.

**Student Tip**

Just as you control access to your work, the work of others deserves consideration and proper credit. If you are unsure on whether you need to cite a multimedia source, consider the following possibilities:

1. **Create** your own media (Does not infringe on copyright; citation not necessary).
2. Search for **Public Domain** media (Copyright has been voluntarily released or has expired; citation not legally necessary, but in academia it is **required**).
3. Search within the **Creative Commons** domain (Verify the requirements under the license. Respect these requirements. **Cite**).
4. Determine if your use of copyrighted material fall under **Fair Use**. (Watch this “Disney” video for further info).

**Teacher Tip**

Having your students save their work in Drive does not mean they are constrained to using Drive’s programs to create texts (Documents, Forms, Spreadsheet, Presentation, etc.). You may have your students create new material using a wide variety of digital programs and still find ways to archive their work in Drive.

For instance, if you have students uploading to or composing mostly in spaces such as Google Sites and Blackboard, encourage them to **simultaneously upload that material** to their Drive course folder. Alternatively, students can copy material already shared in such spaces, pasting them into the proper text generator (for example, copying discussion posts into a Drive Document, or taking screenshots of online work and uploading it to a specific folder for that assignment).
**Fall 2014 Workshops & Open Lab Hours**

You may see the [Google Calendar of Events here](#). To subscribe to the calendar, select the link in the lower right hand corner. If you would like to learn more about using Google Calendars for your own purposes (organizing work, scheduling organization meetings, marking course deadlines), [watch this video for further tips](#)! 

Though the workshops are scheduled for two hour sessions, please feel free to attend, even if you cannot stay the whole time or have to come late.
