Box is an online cloud storage service that allows groups of users to access and edit shared files. Users can upload files, which are then available online at Box to anyone with download permission. This service enables easy collaboration and multimedia sharing across a range of devices, from computers to smartphones. It can also be used as a reliable backup storage solution for assignments and projects.

**Logging in to Box**

To access Box, you must use the Shibboleth sign-in screen. There are two ways of getting there:

- Navigate to odu.box.com and click “Continue” to proceed to authentication.
- Go to Box.com directly, and click “Log In” on the upper right of the page.

You will be redirected to https://apps.box.com/login. This is where you will end up on every subsequent visit to Box if your browser caches the login.

After you are redirected, click “Single Sign On”, which is located below the Log In button.
Enter your ODU Email Address into the space provided, and click “Log In” to proceed to authentication.

At this point, you should be at the Shibboleth Log In screen. Enter your MIDAS ID and Password, then click “Login.”

You should now be able to access Box services through your MIDAS profile.
