Project Guideline

You need to abide by the following guidelines for your project report.

- Page 1. Cover page, typed or printed (3+2 pts)

Project title

Project number

Course number

Student name

Date due

Date handed in

Abstract (not to exceed ½ page)

- Page 2. <u>Technical discussions:</u> One to two pages (max). (10 pts)

Discuss the theoretical background and provide analytical insights (using principal equations, if any) into the expected results, as applicable.

- Page 3 (4 or 5). <u>Discussion of results</u>: One to two pages (max). (10 pts)

Discuss the observed results and explain your observations based on your expected outcomes in technical discussions section, as applicable, to include --

- Results – Image results in gray scale. Attach the relevant image result printouts. Number images individually so they can be referenced in the preceding discussions.

- Appendix – Program listings (in 8-1/2 x 11 format). Standard routines and other

  material obtained from other sources should be acknowledged by name, but their listings should not be included.

  o Attach the relevant code printouts.

Note

o Layout – The entire report must be in 8-1/2 x 11 format. If large printer sheets are used for program listings and image printouts, they must be folded individually to 8-1/2 x 11 size or photo reduced to that size.

o You report must be <u>typed</u> and <u>stapled</u>.
