Canvas Gradebook: Additional Student Information

By default, the Canvas gradebook provides limited information about each student enrolled in a course. From the User Interface, you'll typically only see your students’ names along with graded assignment/assessment columns like this:

![Canvas Gradebook](image)

You may want to view student UINs alongside student names. In Canvas, a student’s UIN is labeled **Integration ID**. Here’s how to view that ID in the gradebook:

1. Open the course gradebook.
2. Mouse over the **Student Name** column header to reveal three vertical dots.
3. Click the three dots to sort the Gradebook by name or ID.
4. To view UINs in the gradebook, click the same three dots, then **Secondary info** and **Integration ID**.
