Before you can use MakeMeAdmin, you need to request a run-as account. You can make the request at midas.odu.edu (full instructions here).

1. Launch the Self Service app from applications or the launchpad.

2. Log in with your run-as account (starting with “adm-”).

3. Find MakeMeAdmin, and click Install or Reinstall.
4. You will have temporary admin rights on your machine for 30 minutes. During these 30 minutes you can perform tasks that require admin authentication using your Mac login credentials. Click OK.

5. After 30 minutes, you’ll see a notice that your temporary admin rights have expired.
