Keep your ODU-managed Mac and keychain passwords in sync with your MIDAS password. Your computer needs to be running Catalina, and you need to be connected to the VPN if you are off campus.

1. In the top right corner of your screen, click the Key icon.

2. Enter your MIDAS ID and password, and click Sign In.

3. Choose whether or not you’d like to automatically sign in.

4. If the password you use to log into your Mac doesn’t match your MIDAS password, you’ll be prompted to sync them. Enter your MIDAS password in the first box and your computer login password in the second box. Then click Sync Password.
