This guide will assist you in installing Microsoft Remote Desktop to access the Monarch Virtual Environment (MOVE). Please make sure you are connected to the internet.

1. Go to the Apple App Store:

   On your computer (Apple Menu > App Store)
   
   ![Finder Screen](image)

   Or on the web (www.apple.com/app-store)
   
   ![App Store Screen](image)

2. Log in and search for Microsoft Remote Desktop. Click Install and follow the prompts. Once complete, click Open.
You can also find the app in your **Applications** folder.

3. When it opens, click **Workspaces**, then **Add Workspace**.
4. In the Add Workspace field, type **https://rdweb.wvd.microsoft.com/api/arm/feeddiscovery**, then click **Add**. Wait while it searches for workspaces.

5. Sign in with your ODU email and click **Next**.
6. Enter the password for your ODU email and click **Sign in**.

7. Authenticate with your second factor.

![Authentication](image2.png)

8. Once you’ve logged in, you’ll see all of the virtual desktops you are authorized to use. Click on the one you’d like to work in.

![Virtual Desktops](image3.png)
9. Log in to the virtual computer. Your Username will be pre-filled; just type in your password and click **Continue**.

![Enter Your User Account](image)

10. You are now logged in.

![Image](image)

11. To log off, click the **Start Button** in the lower left corner (it looks like four small rectangles).
12. Click the top button (that looks like an ID tag or maybe your profile picture).

13. Then click **Sign out** to log out of the virtual computer.
