Portal Manager – WebXtender Plugins

This guide will help you install or upgrade the WebXtender plugins from the Portal Manager.

Requirements

• ITS managed computer
• Portal Manager

Installing WebXtender Plugins

1. To install the latest version of the WebXtender plugins, look on your desktop for the Portal Manager and double-click on it.

2. Check the box next to Software - WebXtender 7 SP1 and click on Launch at the top to start the installation of the WebXtender plugins.
3. When you click on Launch, it will show the status of the installation.

4. Once the installation is complete, the plugins have been installed. If you get an error message, please contact the ITS Help Desk at its@odu.edu or (757) 683-3192.
