Social Mobility in Professional Studies

It is not easy being a Black man in America, navigating the barriers of social and upward mobility. The aftermath of Ahmaud Arbery, George Floyd, Breonna Taylor, and the lives destroyed during the insurrection at the Capitol revealed that our nation has more work to do. Through an interactive workshop experience, Dr. Worsley will share his personal, mentoring and executive-level experiences with participants and facilitate a candid and uncomfortable conversation that brings awareness to social mobility needs.
