

AEROSPACE AT ODU

Translational Research to Commercialization (TRC2) Center in Space and Satellite Systems

Old Dominion University and Virginia Tech, along with public and private sector partners, will establish a Virginia SmallSat Data Consortium. Through the consortium, universities, venture investors and industry leaders in satellite design, software, hardware and data analytics will come together to solve problems through rapid and efficient use of space data. Working with the board, we will use the “Voice of the Customer” (VoC) process to identify ongoing research ventures in the medium and long term.

TRC2 Essential Tasks:

- Create an innovative ecosystem development for SmallSats Service
- Provide data algorithm, processing, analytics, management and integration including command/control operations
- Create jobs in our Commonwealth
- Expand the innovation ecosystem for space and satellite technologies, services and data

TRC2 Partners:

- Old Dominion University
- Virginia Tech
- Commonwealth of Virginia
- Virginia Commercial Space Flight Authority
- NASA Langley
- NASA Wallops
- Virginia Space Grant Consortium
- National Institute for Aerospace
