

Robert Martz

Planning For Climate Change

Robert Martz is a Civil Engineer with 27 years of experience in the public utility field. He is currently a Professional Engineer in Virginia and has worked in Florida and Ohio. Prior experience includes the operations, planning, design, and construction of sanitary sewer pump stations, gravity and pressure mains, along with potable and reclaimed water mains. When he began working for HRSD, he was responsible for coordinating the development of a Regional Hydraulic Model as part of a Consent Decree with the US EPA and 14 local jurisdictions. He is currently working on maintaining the model that took close to 12 years to develop. He is also the lead on HRSD's climate change planning that evaluates the impacts of increased rainfall and sea level rise on all of HRSD's Facilities.

More information on the HRSD can be found here:
