Dear Colleagues

I recently saw the FY24 grant funding and proposal activity reports (attached). These tables reflect what the agencies report to ODU about proposals submitted and grants awarded. It is NOT what we actually spent in FY24 (expenditures). The good news is that the College of Sciences funded grants for FY24 are up 17% over FY23. We will not know until later what our official numbers are for grant expenditures. Also, some grants are reported all in year 1 whereas others are reported year by year. So take these numbers with a large grain of salt.

In the College we submitted proposals totaling \$69.4M in FY24 (down from \$82.2M in FY23). The question now is how to increase our success rate with submitted proposals and how to support faculty to submit more or larger proposals, if that is appropriate. If you have comments and suggestions, please inform Jingdong Mao, Associate Dean for Research. I also want you to know that Yuesheng Xu (Math & Stat) is the COS representative to the DiVRED faculty advisory committee, which will soon start meeting.

The college is also now assessing our progress on the 2024 strategic plan implementation and planning for 2025. This is a great time to send any suggestions to me or to the appropriate Associate Dean.

Best Regards,
Gail

Upcoming Events and Deadlines:

Dec. 14, 9 am: Commencement – faculty report to River Rooms in Webb Center at 8 am

Dec. 14: Proposal deadline for ONR Summer Faculty Research Program

Dec. 31: Last day for the [CVC Campaign](#); the deadline for payroll deduction is Dec. 13
