Dear Colleagues:

We have our 2<sup>nd</sup> College of Sciences Opportunity Networking Event this week on Friday, Nov. 5, from 11 am – 2 pm. The first was in 2019. Various organizations and institutions will be at the Constant Center with information for our students about internships, volunteer opportunities, and undergraduate research. I would appreciate it if you would show the attached flyer in your classes and let students know about this event.

In general we need to do a better job connecting our students with internships. We have put a lot of emphasis on undergraduate research, which is critical, but I want to pay more attention to internships as well. It is particularly important that students learn about the resources available at ODU's [Career Development Services](#). Please encourage students at all levels to visit CDS online so that they can find internships (and jobs, including on campus). Some companies have internship applications due before the holidays.

Thank you!!

Gail
