Dear Colleagues:

There are now two avenues for research seed funding available from the College of Sciences.

The first is the Cheng Fund for Innovative Research. This is the 4th year we have offered this funding opportunity to tenured or tenure track faculty in the college. The goal of this fund is to encourage innovative research that will lead to a new proposal for federal funding. This year we have \$15,000 available in the Cheng Fund.

The second is a new opportunity that has been established to encourage collaboration among faculty in the college to apply data science techniques to other areas of science. We have allocated \$12,000 for this seed funding this year.

Please find attached information about how to apply for these funds. Applications are due by 5 pm on Monday, Feb. 28, 2022 to Associate Dean Rodger Harvey.

Best Regards,
Gail
