Faculty Senate Issue Log Form

Date-Submitted: 10/28/2021

Title-of-Issue: Eligibility of Clinical Faculty for the Research Incentives Program and Summer Research Proposal Funding

Description: Clinical faculty lines require scholarship as one of the three areas of evaluation. The Research Incentive Program and the Summer Research Proposal Funding opportunities are only available to tenure -track or tenured faculty members.

Rationale: Due to the fact that clinical faculty must participate in scholarship as part of the evaluation process, it would seem appropriate to allow them to be eligible for the two research related opportunities presented. Grantsmanship is one of the possible components of clinical scholarship, therefore we should provide opportunities for clinical faculty to be eligible.
