# Installing Microsoft Windows App to Access MOVE (Mac OS)

This guide will assist you in installing Microsoft Windows App to access the Monarch Virtual Environment (MOVE). Please make sure you are connected to the internet.

1. Go to the Apple App Store:
   On your computer (**Apple Menu > App Store**)

   Or on the web (www.apple.com/app-store)

2. Log in and search for **Windows App**. Click **Install** and follow the prompts. Once complete, click **Open**.
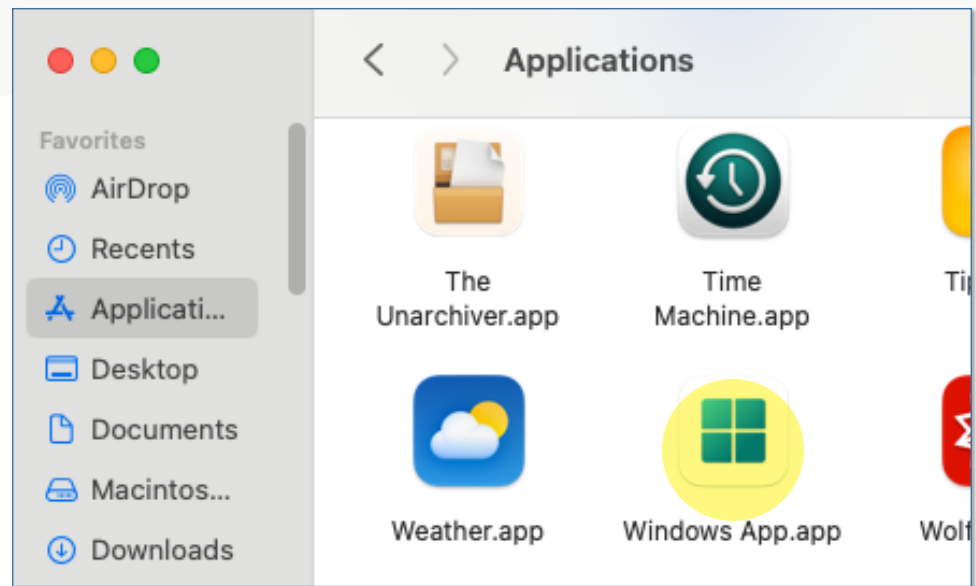

**IT Help Desk**

odu.edu/helpdesk

(757) 683-3192
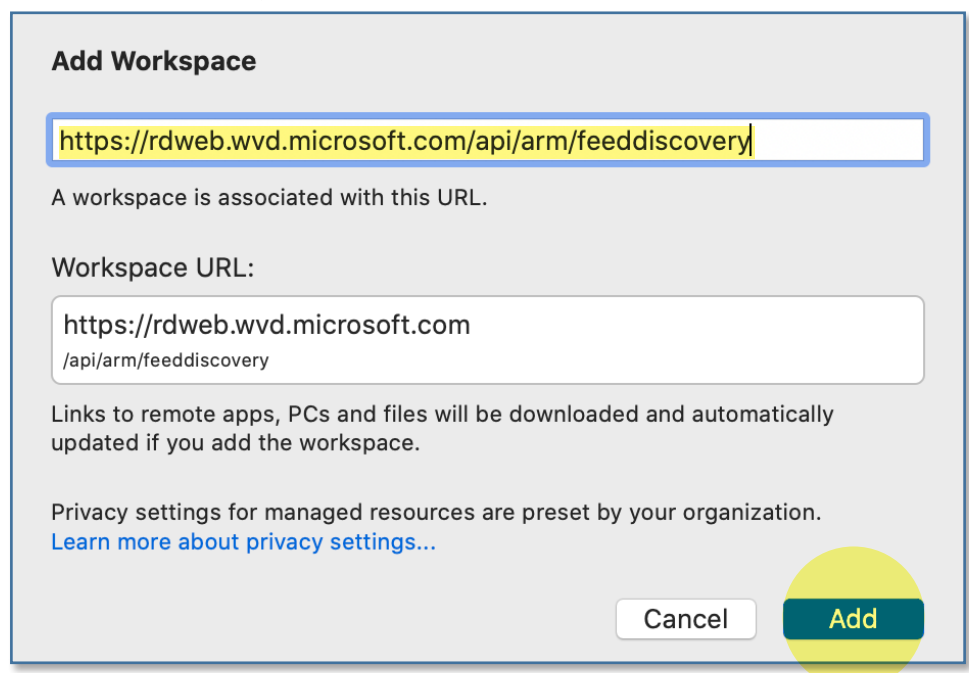

itshelp@odu.edu

1100 Monarch Hall

OLD DOMINION
UNIVERSITY

You can also find the app in your **Applications** folder.

3. When it opens, click the **+** button, then **Add Workspace**.

4. In the Add Workspace field, type **https://rdweb.wvd.microsoft.com/api/arm/feeddiscovery**, then click **Add**. Wait while it searches for workspaces.
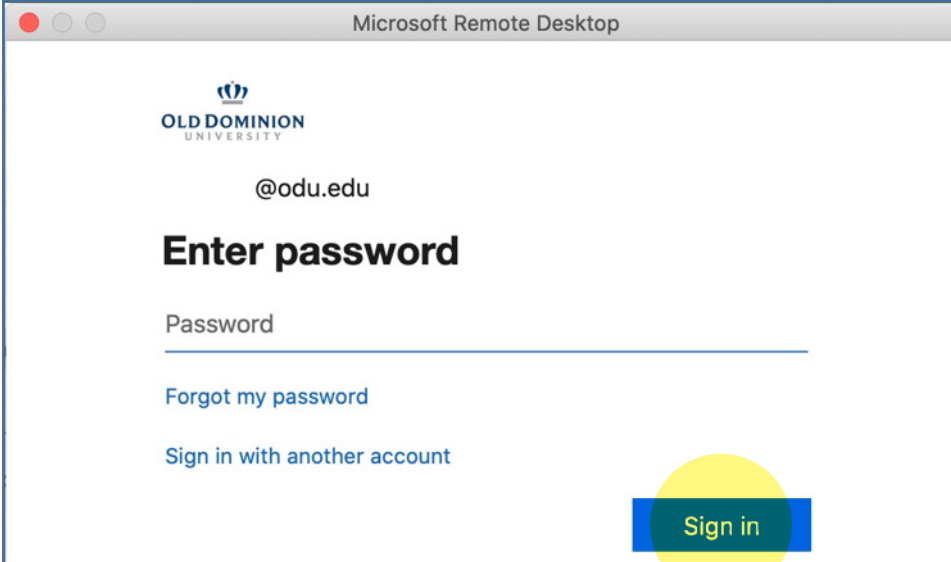

5. Sign in with your ODU email and click **Next**.

6. Enter the password for your ODU email and click **Sign in**.

7. Authenticate with your second factor.
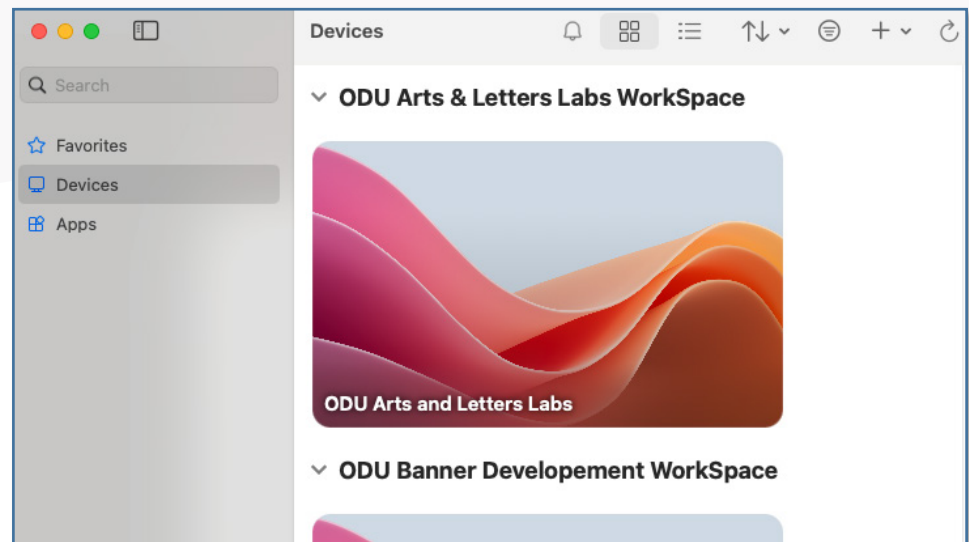

9. Log in to the virtual computer. Your Username will be pre-filled; just type in your password and click **Continue**.

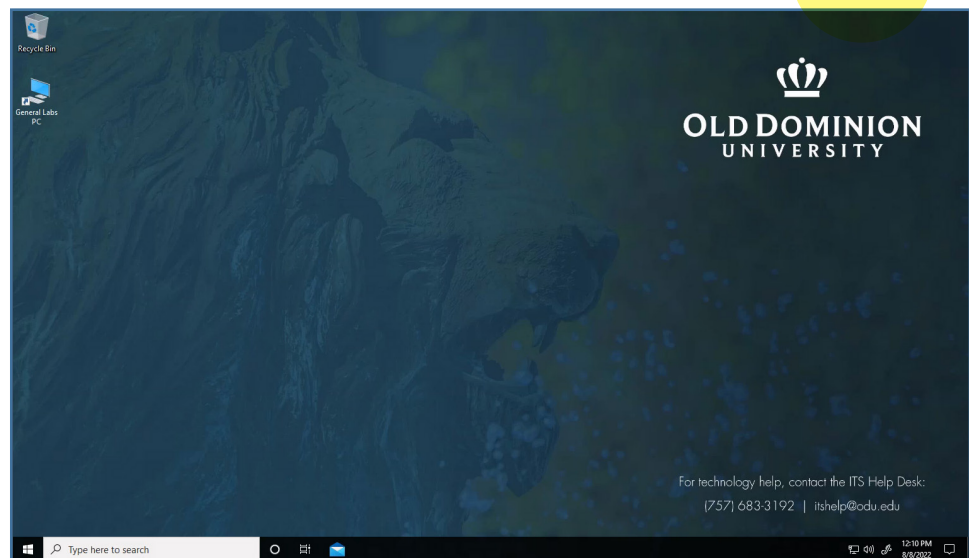

10. You are now logged in.

11. To log off, click the **Start Button** in the lower left corner (it looks like four small rectangles).

12. Click the avatar button
(that looks like an ID tag or maybe your profile picture).

13. Then click **Sign out** to log out of the virtual computer.
