

Research Experiences for Undergraduates (REU) in Multidisciplinary Cybersecurity

Center for Cybersecurity Education and Research (CCSER) and
Department of Electrical and Computer Engineering
Old Dominion University

<https://www.odureu.org/cyber-application>

Funded by National Science Foundation (NSF)

Highlights:

- This is a multidisciplinary cybersecurity research site for REU.
- Students from **all relevant disciplines** are encouraged to apply. Applicants may choose from research projects across multiple disciplines like computer science, electrical engineering, computer engineering, criminal justice, information technology, psychology, etc., listed in the REU website for 2018.
- REU experience includes various events including seminars, panels on industry career/graduate school, field trips to local entities including naval base, etc.

Support:

- \$6,200 for stipends and food, free on-campus housing
- Travel allowance (contact the program director for more information)

Qualifications:

- U.S. citizen or permanent resident, with preferred GPA 3.0+
- Must be an undergraduate student with graduation date later than 8/15/2018

Requirements:

- Conduct cybersecurity research with a faculty mentor for 10 weeks, May 30 – August 3, 2018
- Attend weekly research meetings and other events
- Write a research report and poster by the end of the program

Application:

- Apply online at: <https://www.odureu.org/cyber>
- Underrepresented minority and female students are highly encouraged to apply
- The application deadline is **March 1** (the recommendation letter also needs to be received by this date). **Earlier applications are strongly encouraged.**
